Profile

Junior Full-Stack Developer with a degree in Computer Science from Universitas Halu Oleo, specializing in JavaScript and TypeScript-based web application development. Proficient in building end-to-end services with React, Node.js, and API-driven architectures. Adept at applying clean code and MVC design patterns to ensure high maintainability and system efficiency.

Education

Universitas Halu Oleo Bachelor of Computer Science GPA: 3.65	Kendari, Sulawesi Tenggara Sep 2021 – Dec 2025
--	---

Experience

Bangkit Academy 2024 Batch 2 Cloud Computing Cohort	Sep 2024 – Jan 2025
- Set up a CI/CD pipeline from GitHub to Cloud Run, automating API deployment for a crypto price prediction app. - Developed and documented RESTful API endpoints using Flask, complete with a detailed README for the team. - Collaborated with a cross-functional team of 7 to complete the final capstone project.	

Projects

Web Community Portal Full Stack Web Developer	Apri 2026 - Present
Website : kkg-community.vercel.app	
- Built a community portal with React.js and Tailwind CSS, taking a mobile-first approach for a smooth experience across devices. - Hooked up Google Forms and Google Drive via Apps Script to handle document uploads and storage for the community. - Kept costs low by leveraging Google's platform as the main data repository, supporting large-volume document uploads without extra infrastructure.	
Academic Certificate Verification System Full Stack Web Developer	Jul 2025 – Dec 2025
Frontend Repository: fe-toefl-verification Backend Repository: be-toefl-verification	
- Designed and built a full-stack dApp using the MERN stack and TypeScript, connecting the frontend to blockchain smart contracts and the backend to IPFS. - Implemented Role-Based Access Control (RBAC) to lock down API endpoints for institutions, students, and independent verifiers. - Ran thorough end-to-end API testing with Postman to make sure everything worked reliably before going live.	

Skills
